

IN THE CLAIMS:

Please amend Claims 1, 8 and 10 to 17 as follows. The claims, as pending in the subject application, read as follows:

B1  
1. (Currently Amended) A control method for controlling a printer for providing print-by-reference functionality to a web browser, the method comprising the steps of:

providing a web page from a printer's embedded web server to the web browser;

receiving a URL entered into the provided web page by the web browser;

the printer retrieving a document to be printed corresponding to the URL from a web site on the Internet; and

the printer automatically printing the retrieved document.

2. (Original) A method according to Claim 1, wherein the web page is in HTML format.

3. (Original) A method according to Claim 1, wherein the web page is in XML format.

4. (Original) A method according to Claim 1, wherein the document is in a print-ready format.

5. (Currently Amended) A method according to Claim 1, further comprising, the printer converting retrieved the document to a print-ready format.

6. (Previously Presented) A method according to Claim 1, wherein the URL corresponds to a web site having a transfer protocol not supported by the web browser, and the method further comprises the steps of:

creating a web page based on contents of the website, the web page including a link to a directory, a link to a document, or links to a directory and a document, wherein, if a link to a directory is selected, a new web page is created including a link to a subdirectory, a link to a document, or links to a subdirectory and to a document.

7. (Original) A method according to Claim 6, wherein the web page is accessed using HTTP, and the entered URL corresponds to a FTP using website.

8. (Currently Amended) A method according to Claim 1, further comprising the steps of:

creating a web page based on contents of the website, the web page including hypertext links[[],];  
selecting a link; and  
issuing a directory access command corresponding to the selected link,  
wherein, if the command fails, a document is retrieved corresponding to the selected link, and

wherein, if the command succeeds, a new web page is created having  
hypertext links.

9. (Canceled)

B1  
10. (Currently Amended) Computer-executable process steps stored on a  
computer-readable medium, the steps to control a printer for providing print-by-reference  
functionality to a web browser, the steps comprising:

providing a web page from a printer's embedded web server to the web  
browser;

receiving a URL entered into the provided web page by the web browser;

the printer retrieving a document to be printed corresponding to the URL  
from a web site on the Internet; and

the printer automatically printing the retrieved document.

11. (Currently Amended) Computer-executable process ~~Process~~ steps  
according to Claim 10, wherein the web page is in HTML format.

12. (Currently Amended) Computer-executable process ~~Process~~ steps  
according to Claim 10, wherein the web page is in XML format.

13. (Currently Amended) Computer-executable process ~~Process~~ steps  
according to Claim 10, wherein the document is in a print-ready format.

14. (Currently Amended) Computer-executable process ~~Process~~ steps according to Claim 10, further comprising the printer a converting ~~step to convert~~ the retrieved document to a print-ready format.

15. (Currently Amended) Computer-executable process steps according to Claim 10, wherein the URL corresponds to a web site having a transfer protocol not supported by the web browser, the process steps further comprising ~~comprise~~:

BL [[a]] creating ~~step to create~~ a web page based on contents of the website, the web page including a link to a directory, a link to a document, or links to a directory and a document,

wherein, if a link to a directory is selected, a new web page is created including a link to a subdirectory, a link to a document, or links to a subdirectory and to a document.

16. (Currently Amended) Computer-executable process ~~Process~~ steps according to Claim 15, wherein the web page is accessed using HTTP, and the entered URL corresponds to a FTP using website.

17. (Currently Amended) Computer-executable process steps according to Claim 10, further comprising the steps of:

creating a web page based on contents of the website, the web page including hypertext links[.,,];

selecting a link; and

issuing a directory access command corresponding to the selected link,  
wherein, if the command fails, a document is retrieved corresponding to the  
selected link, and  
wherein, if the command succeeds, a new web page is created having  
hypertext links.

18. (Canceled)

B1  
19. (Original) A method according to Claim 1, wherein the URL contains  
e-mail account identification information.

20. (Original) A method according to Claim 19, wherein the web page  
allows entry of the e-mail account identification information.

21. (Canceled)

22. (Previously Presented) A method according to Claim 6, wherein the  
URL contains e-mail account identification information, and

wherein the created web page contains information retrieved from the e-  
mail account re-formatted into web format.

23. and 24. (Canceled)

25. (Original) Computer-executable process steps according to Claim 10,  
wherein the URL contains e-mail account identification information.

26. (Original) Computer-executable process steps according to Claim 25,  
wherein the web page allows entry of the e-mail account identification information.

B<sup>1</sup>  
27. to 30. (Canceled)

31. (Previously Presented) A method according to Claim 1, further  
comprising transforming the retrieved document into a printable document,  
wherein the step of printing the retrieved document is printing the printable  
document.

32. (Previously Presented) A method according to Claim 1, wherein the  
retrieved document is transformed into a printable document in advance.
